

Diagnostic Audit

Information & Data Request

Consult for Africa · Workstream 1 of the engagement · for the Haven Paediatric Centre board and management

Point of contact (Haven): to be nominated; we suggest the Head of Operations.

How to share: a single secure, read-only shared folder with a sub-folder per section. A CSV / Excel export from the accounting, EMR or payroll system is perfectly fine. Everything is handled under strict confidentiality and used only for this audit.

The twelve Week-1 Critical items are marked [Week 1]. These unlock the analysis immediately; the rest can follow during weeks 1 to 2. Nothing here is a test; partial or imperfect records are themselves a finding, so please share what exists rather than reconstructing anything.

A. Corporate, licensing & governance

- Certificate of incorporation, shareholding/ownership structure, current board composition
- Facility operating licence and regulatory registrations (HEFAMAA Lagos and any others), current validity
- Organisation chart / organogram with reporting lines **[Week 1]**
- Register of current policies and the SOP index (a list of what exists)
- Board and management meeting minutes, last 12 months
- Professional indemnity / facility insurance policies; details of any pending litigation or regulatory action

B. Finance: statements, ledgers & cash

- Monthly management accounts / profit & loss, last 12 months **[Week 1]**
- Latest balance sheet and most recent prior year-end
- Bank statements for all accounts, last 6–12 months **[Week 1]**
- Latest trial balance and the chart of accounts
- Current-year budget and budget-vs-actual, if prepared
- Fixed asset register
- Any audited financials or prior accountant's / auditor's reports
- Accounting system in use, with read access or exports

C. Revenue & receivables

- Revenue by service line / department, monthly, last 12 months **[Week 1]**
- Revenue split by payer: self-pay / private vs each HMO
- Debtors / receivables ageing by payer, current, where the ~N4.2M sits **[Week 1]**
- Current price list / tariff for all services **[Week 1]**
- Deposit, billing and credit policy (documented or described)

D. HMO / payer economics

- All HMO contracts and tariff schedules (Leadway, NEM, and any others) **[Week 1]**
- HMO claims register: submitted / approved / rejected / paid / outstanding, per HMO
- Claim rejection reasons (summary or raw log)
- Enrollee volumes and typical claim-cycle time per HMO
- Any capitation vs fee-for-service arrangements

E. Pharmacy, stock & inventory

- Full current stock count (drugs and consumables) with quantities and values (the ~N2.77M) **[Week 1]**
- Stock valuation method and last stock-count date
- Pharmacy sales report, last 6–12 months
- Purchase records / supplier invoices, last 6–12 months
- Reorder levels and stock-control policy, if any
- Expired / near-expiry and wastage log
- Stockout log or list of known stockout incidents
- Current crash-cart contents list and any existing check records
- Pharmacy margin working (cost vs selling by line, if available)

F. Procurement & payables

- Supplier list with credit terms and typical lead times
- Procurement and approval process (documented or described)
- Creditors / accounts-payable ageing
- Any existing vendor-managed-inventory or consignment arrangements

G. Staffing, payroll & HR

- Full staff list: name, role, department, employment type, start date **[Week 1]**
- Payroll register / salary schedule (gross, allowances, deductions, net), last 3 months **[Week 1]**
- Job descriptions for all roles, and any current KPIs
- Current staff commission / incentive structure, and the proposed one awaiting board approval **[Week 1]**
- Employment contracts / offer letters (samples plus key clinical roles)
- Duty rosters / shift schedules, last 2 months
- Staff turnover: joiners and leavers, last 12 months
- Training records (including BLS / PALS / NRP / resuscitation)
- Disciplinary and grievance log
- Statutory compliance status: PAYE, pension, NHF

H. Clinical governance & patient safety

- Clinical protocols and guidelines in use (general paediatrics and NICU)
- Incident / adverse-event register and near-miss log
- Mortality & morbidity review records and M&M; meeting minutes
- Emergency / resuscitation protocols, the crash-cart standard, and resuscitation training records
- Medication-management policy and sample drug charts
- Infection prevention & control policy and any audit records
- NICU admission criteria and protocols
- Consent forms and sample clinical documentation; patient complaints register

I. Operations & patient flow

- Patient volumes by month, last 12 months: OPD attendances, admissions, NICU admissions **[Week 1]**
- Average length of stay and bed occupancy (general and NICU)
- Booking / appointment system and its data
- SOPs for registration, triage, admission, discharge and billing (what exists)
- Any patient-satisfaction or customer-feedback data; facility layout and bed configuration

J. Management reporting & systems

- The current management report(s) (including the fortnightly report) and any dashboards **[Week 1]**
- The list of KPIs currently tracked
- EMR / HMIS / billing software in use, with read access or data exports

What happens with this

Week 1 we reconcile the numbers, size the working-capital opportunity precisely, and map the operating model. Week 2 we are on site for interviews and observation. Week 3 covers finance, procurement, HMO and reporting-integrity deep-dives. Week 4 we synthesise into a prioritised, costed plan and present to the board. Two quick wins (the crash-cart standard and the Leadway/NEM receivables push) begin in week 1, before the audit reports.
