

Haven Paediatric Centre

Diagnostic Audit: Survey Results

16 caregiver responses · 23 staff responses · both anonymous · Fieldwork 22 Jul 2026 to 14 Aug 2026 · Scale 1 to 5 · Prepared by Consult for Africa

CAREGIVER RATING

4.60 /5
mean, all items

WOULD RECOMMEND

13 /15
definitely, to other parents

STAFF RATING

3.94 /5
mean of positive items

SAFETY GRADED

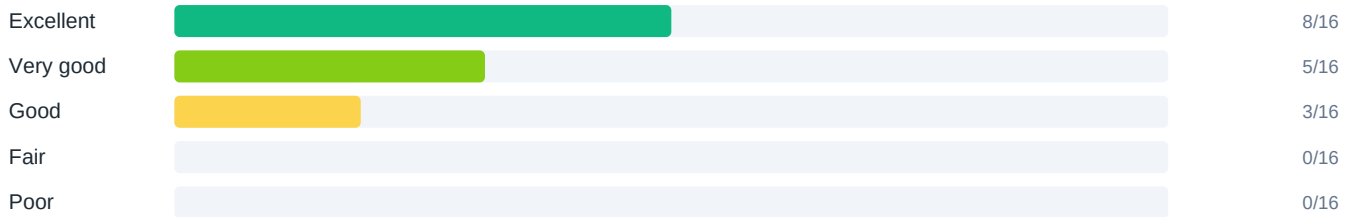

22 /23
very good or excellent

PART ONE

What families say

16 parents and caregivers responded anonymously between 4 Aug 2026 and 14 Aug 2026. This is the first time patient voice has been measured at Haven, and it is the strongest result in the diagnostic.

OVERALL EXPERIENCE

WOULD RECOMMEND HAVEN TO OTHER PARENTS

▲ Strongest signals

It was easy to book and be seen at Haven.	4.88
The facility was clean and comfortable.	4.88
Staff treated me and my child with respect and kindness.	4.81
I had confidence in the medical team.	4.81
I felt my child was safe and well cared for here.	4.75

▼ Where to look next

Charges and payments were explained to me clearly.	4.00
I did not wait too long to be attended to.	4.31
I always knew what was happening with my child's care.	4.33
The doctor or nurse explained my child's care in a way I understood.	4.56
I felt listened to, and able to ask questions.	4.62

WHAT FAMILIES ARE TELLING US

The result is unambiguous. The mean across all ten items is 4.60 of 5, every respondent rated their overall experience Good or better, 8 of 16 rated it Excellent, and 13 of 15 would definitely recommend Haven to other parents. Cleanliness (4.88), ease of access (4.88), confidence in the medical team (4.81) and being treated with kindness (4.81) are the strongest signals.

Three softer edges, and they are all about information. Clarity of charges and payments (4.00) is the lowest item in the instrument. Knowing what is happening with the child's care (4.33) and waiting time (4.31) follow. None is a failing score. All three are communication rather than clinical, which makes them inexpensive to fix.

The comments ask for access, not for better care. Remote consultation for families who travel long distances, electronic access to results, clearer information on the cost of medicines billed to health plans, and more doctors on site. Every one of these is a request to make an experience they already rate highly easier to reach.

IN THEIR OWN WORDS

ONE THING WE COULD DO BETTER • 6

Access to online results for my child. Or it be sent via email

Overall everything was good

Virtual consultation shouldn't require payment as long the patient is registered at the hospital. Not everything requires bringing the kid(s) to the hospital. Pity those of us who stay very very far

I hope cost of medications when using hmo can be clearly stated...hmo complained and send us list of items that were costed by the organization however we were surprise by such cost but we cared less because our child health was a priority at such period....I think there is a gap of information on cost of medication administer to patients and bills sent to hmo for payment...

The service was efficient and it is a great place.

At least 2 to 3 doctors on sit

PART TWO

What staff say

23 staff responded anonymously between 22 Jul 2026 and 6 Aug 2026, across nine sections adapted from a recognised hospital safety-culture instrument. Read alongside Part One, it shows an organisation whose people are producing an excellent patient experience without the systems that should be supporting them.

RESPONSES	SAFETY GRADE	POSITIVE ITEMS AVG	RECOMMEND CARE
23	15 /23	3.94 /5	4.48 /5
Staff, anonymous	rated Excellent	mean of positive items	place to receive care

OVERALL GRADE ON PATIENT SAFETY

Excellent		15/23
Very good		7/23
Acceptable		1/23
Poor		0/23
Failing		0/23

▲ Strongest signals

I would recommend Haven as a place to receive care.	4.48
If a child needed emergency resuscitation right now, we would have what we need.	4.45
The crash cart / emergency tray is fully stocked and ready.	4.35
Staff in my area treat each other with respect.	4.35
I understand clearly what I am responsible for and what good performance looks like in my role.	4.35

▼ Where to look next

I have had recent resuscitation training (BLS / PALS / NRP) for the patients I care for.	2.80
The way pay, commission or rewards work here is fair and clear.	2.94
Staff feel free to question the decisions or actions of those with more authority.	3.33
The rewards and recognition here encourage good, safe, careful work, not just speed or volume.	3.35
When an event is reported, it feels like the person is blamed, not the problem fixed. (rev)	2.41

WHAT THE NUMBERS SAY

Safety and teamwork read strongly. Every respondent graded patient safety Acceptable or better and 22 of 23 graded it Very good or Excellent. Teamwork (4.35), handovers (4.23), learning from error (4.23) and management commitment to safety (4.23) all sit at or above 4.2, and the reverse-worded risk items sit low, which is the good result.

The soft edges are all about the deal, not the work. Pay and reward fairness (2.94) is the weakest positive item in the instrument, recognition (3.35) is close behind, and freedom to question those with more authority (3.33) shows that voice is conditional. Resuscitation training currency (2.80) is the single lowest score and is a clinical exposure rather than a welfare one.

The reverse items point at just culture. Feeling blamed rather than helped after reporting an event (2.41) is the weakest of the reverse set. Set against a documented absence of any incident register, it is the edge most worth protecting, because an organisation that reports openly is far harder to build than one that records formally.

The free text is remarkably consistent. Two themes dominate: more staffing for patient safety, and staff welfare, meaning health insurance, pension, fair and timely pay, recognition and clinical training, for a better place to work. Facility asks form a secondary cluster: bed spaces, inpatient communication, lift access, and ward flooding. Almost every critical comment is prefaced with warmth about the place.

YOUR AREA & TEAMWORK

Staff in my area treat each other with respect.		4.35	n=23
When the workload is heavy, we work together as a team to get it done.		4.22	n=23
In this area, people support one another.		4.17	n=23
During busy or difficult moments, we have the staff we need to handle the work.		4.00	n=23
The work pace here is so high that it feels unsafe. (rev)		1.78	n=23

COMMUNICATION & OPENNESS

Staff feel free to question the decisions or actions of those with more authority.		3.33	n=21 · NA 2
Staff speak up if they see something that might negatively affect patient care.		4.14	n=22 · NA 1
Staff are afraid to ask questions when something does not seem right. (rev)		2.17	n=23
When staff make an error, we talk about it so we can learn from it.		4.23	n=22
We are told about changes to procedures and about mistakes that happen here.		3.83	n=23

RESPONSE TO MISTAKES

Staff feel that their mistakes are held against them. (rev)		2.24	n=21 · NA 2
When an event is reported, it feels like the person is blamed, not the problem fixed. (rev)		2.41	n=22 · NA 1
When we make mistakes, we are treated fairly.		3.71	n=21 · NA 2
Repeated problems are dealt with constructively, not just punished.		3.73	n=22 · NA 1

REPORTING & LEARNING

When a mistake is caught before it reaches a patient, it is reported.		3.86	n=22 · NA 1
When a mistake reaches a patient but causes no harm, it is reported.		3.95	n=22 · NA 1
We are given feedback about changes made because of what gets reported.		3.76	n=21 · NA 2
After a problem, this area actually changes how it works to prevent it recurring.		4.00	n=23
I know how to report a patient-safety concern here.		3.95	n=21 · NA 1

MANAGEMENT & SUPERVISOR SUPPORT

My supervisor / matron seriously considers staff suggestions for improving safety.		4.00	n=23
My supervisor / matron overlooks safety problems that happen over and over. (rev)		1.87	n=23
Management provides the resources (staff, equipment, drugs) needed to give safe care.		3.65	n=23
Management's actions show that patient safety is a top priority.		4.23	n=22 · NA 1
Management only seems interested in patient safety after something goes wrong. (rev)		2.17	n=23

HANDOVERS BETWEEN SHIFTS

Important patient-care information is shared clearly across shifts.		4.23	n=22 · NA 1
Things fall between the cracks when patients are handed over between shifts or staff. (rev)		1.90	n=20 · NA 3
Shift changes are a risky time for patients here. (rev)		1.64	n=22 · NA 1

EMERGENCY READINESS & ROUTINES

The crash cart / emergency tray is fully stocked and ready.		4.35	n=20 · NA 3
There is a routine, every shift, for checking emergency drugs and equipment.		4.17	n=18 · NA 5
If a child needed emergency resuscitation right now, we would have what we need.		4.45	n=20 · NA 3
Essential drugs or consumables are out of stock when we need them. (rev)		1.82	n=17 · NA 6

EMERGENCY READINESS (ABOUT YOU)

I have had recent resuscitation training (BLS / PALS / NRP) for the patients I care for.		2.80	n=20 · NA 1
--	--	------	-------------

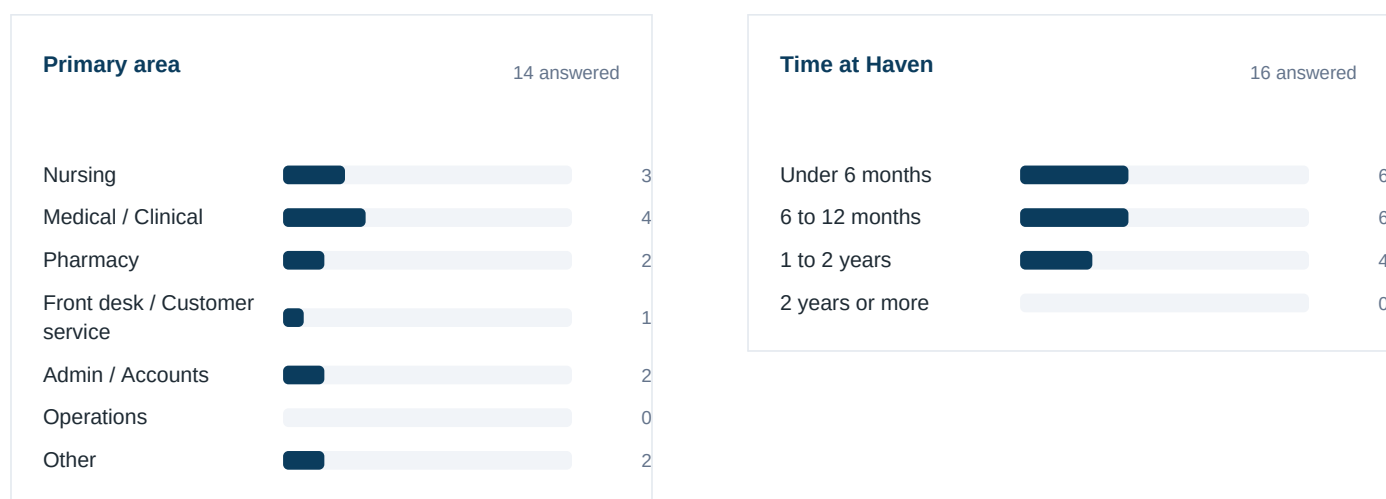

FAIRNESS, INCENTIVES & OWNERSHIP

I understand clearly what I am responsible for and what good performance looks like in my role.		4.35	n=23
The way pay, commission or rewards work here is fair and clear.		2.94	n=18 · NA 4
The rewards and recognition here encourage good, safe, careful work, not just speed or volume.		3.35	n=20 · NA 3
I feel a sense of ownership for how well Haven runs, not just my own tasks.		3.95	n=21 · NA 2

RECOMMENDATION

I would recommend Haven as a place to receive care.		4.48	n=23
I would recommend Haven as a place to work.		4.09	n=23

WHO RESPONDED (optional, self-reported)

IN THEIR OWN WORDS

ONE THING THAT WOULD MAKE HAVEN SAFER FOR PATIENTS · 13

Honestly we have most of what patients need to stay safe both seasoned manpower and material resources for their care . The rest of it is in Gods hands fr. We really do our best and one day it'll be enough

A bigger place not that what we have is not working for us, but we are growing bigger

Prompt and seamless service delivery,
Reduction in waiting time are of great essence.

Ensure adequate staffing and provide all staff with the equipment, training, and resources needed to deliver safe, high-quality patient care.

So far, my observation of patient experience at haven is amazing. But adding feeding to the bill will be fine especially for those who have an infection and there doubt about hygiene.

More bed spaces for patient care.
A tele health patient cent-red care for patients who can't be physically present in the hospital.
Essentials like microwave, freezers are needed for inpatient.
Patient caregivers complain a lot of the stair cases, they ask for elevator.
The general ward gets flooded when it rains.

Timely response to patient

Improve the communication system, especially that of the inpatient

Employ more manpower,

Employ more staffs

Provision of essential consumable everytime

Providing adequate pharmaceutical care services for optimal therapeutic outcomes , that is timely, safe, effective, efficient and patient centered

Nil

ONE THING THAT WOULD MAKE HAVEN A BETTER PLACE TO WORK · 14

Working at Haven has been a major boost for my career ngl. If I'm to chip in something it'll be health insurance for staff and then any of the goodies the management's already working on.

Better staff benefits.

Structure and benefits, I understand that Haven is young but employees have a sense of belonging when they know that there is a future for them. E.g Pension plan, health insurance etc.

Rhe management knows best.

Improve staff welfare by offering fair pay, recognizing employees' efforts, ensuring open communication, and creating a supportive and respectful work environment.

Hmmm. So far, everything is awesome but i would suggest a staff welfare plan/package like lunch daily while on duty.

Staffs care i.e health insurance, pensions and safety is not into consideration. Staff training especially clinical staffs on PALS, BLS,HIPPA. Monthly rewards(forms of encouragement) from management to staffs Team bonding activities, maybe monthly within Haven staff.
Good communication among staff
Fair recognition Fair and timely salary increament Improve staff welfare No talking to staff Impolitely
Team work
Working as a team and family
Team work
Adopting a seamless process in operations , fostering a culture of safety, effective teamwork, communication , collaboration and professionalism.
Nil

Method. Two anonymous on-platform surveys. 16 caregiver responses collected 4 Aug 2026 to 14 Aug 2026, and 23 staff responses collected 22 Jul 2026 to 6 Aug 2026. Scale items run 1 (strongly disagree or never) to 5 (strongly agree or always); “N/A, don’t know” is excluded from the mean. **n** is the number of scored answers per item. **(rev)**-tagged items are negatively worded, so a lower score is the good result; colour is set on that basis and they are excluded from the positive-items average. Distribution bars run red (1) to green (5). Both instruments are self-selecting and anonymous, so they measure the views of those who chose to respond rather than of the whole population. Free-text comments are reproduced verbatim, including original spelling. Prepared by Consult for Africa for Haven Paediatric Centre; figures reflect responses as at 14 Aug 2026.
