Lagos and Abuja, Nigeria

01 / THE CONCEPT

A premium address that filters and refers.

A premium conversion clinic in a converted Asokoro or Maitama townhouse, serving high-net-worth Abuja, the diplomatic community and returning diaspora. On the surface a real clinic where consultation, investigation and entry-point treatment happen. Underneath, the qualification front-end for two outbound pathways, Alameda in Egypt for complex traditional care and Medeeze in Thailand for regenerative, and the first phase of a hospital co-owned with the partners.

The full strategy, model of care, referral architecture and property brief are in the companion working document. This is the proposal for how Consult for Africa delivers it, for your decision as the Hospitals lead.

02 / WHAT C4A DELIVERS

From an empty townhouse to a running clinic.

Location search and site evaluation. C4A engages Abuja agents and its own network, visits and filters against the conversion criteria, and returns a shortlist with a comparative evaluation. Your shortlist feeds it too, and the final site decision is yours.

Renovation project management. The clinical and commercial fit-out brief, the interior partner (O'cubed or Anfani, or your preferred), and end-to-end programme management to snagging and handover.

The model of care and the referral engine. The closed-circuit, doctor-to-doctor referral architecture that replaces walk-in marketing, and the case-routing between Nigeria, Alameda and Medeeze.

Technology and equipment. HospitIOS configured before the first patient, and the equipment schedule for the conversion brief.

03 / COMMERCIALS

Priced to the work, and to your call.

Priced so the facility economics rest on delivery, not on a search fee. The final site decision, and the go or no-go, sit with you.

Item	Basis
Location search and engagement management	NGN 750,000 mobilisation. Agency and legal fees contracted directly by Medbury
Renovation project management	12% of project cost, billed in three tranches: brief, practical completion, handover
Model of care and referral design	Included in the engagement

04 / NEXT STEPS

Sites first, within the month.

- 1. Confirm the search brief and the Asokoro or Maitama envelope.

2. C4A returns three to five shortlisted townhouses, assessed against the conversion criteria, within five working days of each visit.
3. On your selected site, a costed lease-and-renovation plan.
