01 / THE SITUATION

The reach is real. The margins are not managed.

Corporate Wellness sits inside Nigeria's most established occupational health company, with a national footprint and a share of the group's 785 corporate clients. The asset is real. The arm is nonetheless making losses, and the cause is commercial rather than structural: pricing and margin are not being actively managed, and there is no client-by-client read on where the unit makes and loses money.

This is a solvable problem with the right commercial hand and the right data, not a restructuring. The offer below is support from the Group CEO's office to fix it, run at your direction.

02 / WHAT WE PROPOSE

A commercial audit, a pricing redesign, and the discipline to hold it.

A commercial audit, first 60 days. Pricing, margin structure, cost base and client-by-client profitability, so the losses have a name and a number.

A pricing and margin redesign. Repricing where the unit is underwater, a clear margin floor, and a service and cost mix that the catchment and the contracts support.

Implementation support. C4A works alongside your team to install the new pricing and the reporting discipline that keeps it, rather than handing over a document.

A commercial lead, if you want one. If the unit needs a dedicated commercial manager, C4A sources and vets candidates through Maarova. Your call, not a condition.

03 / HOW IT WORKS, AND WHAT IT COSTS

Support, not a takeover.

This comes through the Office of the Group CEO as support. You own the unit and the decisions; C4A brings the commercial capability, the analysis and the hands. The audit carries no fee within the group engagement; implementation is scoped against the plan it produces.

Item	Basis
Corporate Wellness commercial audit	Complimentary within the group engagement (market value NGN 1,000,000)
Pricing redesign and implementation support	Scoped against the audit findings and the plan agreed with you
Commercial lead search (optional)	Via Maarova, 15% of first-year total compensation if taken up

04 / NEXT STEPS

A short start, a fast read.

1. A 30-minute kickoff to align on the unit's contracts and the data we need.
2. The 60-day commercial audit, with a written read on where the losses are.
3. The pricing redesign and the implementation plan, delivered with you.

This proposal is offered as support through the Office of the Group Chief Executive. The business unit head owns the unit and the decision; scope and commercials are agreed in writing before any work begins.
