
CONSULT FOR AFRICA / HEALTHCARE TRANSFORMATION

A PROPOSAL VIA THE OFFICE OF THE GROUP CHIEF EXECUTIVE

Growing Diagnostics, and reading it with AI

Turning national reach into national revenue, and adding AI-enabled interpretation.

PREPARED FOR

The Business Unit Head, Medbury Diagnostics (Lifecheck)

VIA

The Office of the Group Chief Executive, Medbury Healthcare Group

SUPPORTED BY

Consult for Africa

DATE

July 2026

Lagos and Abuja, Nigeria

01 / THE SITUATION

National reach, commercial output below it.

The Lifecheck network and its partner labs give Medbury Diagnostics reach across Nigeria that its commercial output does not yet reflect. Two gaps explain most of the gap. There is no structured, product-led growth engine, clear packages, transparent pricing, digital booking. And interpretation is still fully manual, when AI can now assist it. Both are addressable now, and both are at your direction.

02 / WHAT WE PROPOSE

A growth engine, and an AI reading layer.

Product-led growth

Product architecture and pricing. A clear package set, wellness screens, executive health, condition-specific panels, with simple names, transparent pricing and online booking. The product has to be understandable before it can be marketed.

National digital marketing and cross-sell. Search and social campaigns across the Lifecheck cities, and a structured cross-sell of the group's 785 corporate clients into diagnostics packages.

One brand, one booking system. Brand, pricing and booking harmonised across the centres and partner labs, carried on HospitlOS, so a patient gets one Medbury Diagnostics experience wherever they engage.

AI-enabled interpretation

In parallel, C4A works with your team to add AI-assisted interpretation of diagnostic results, imaging, pathology and multi-panel biochemistry. The brief covers evaluation of the available platforms, a clinical-governance framework so the clinician stays in charge, and a structured pilot before any group-wide rollout.

03 / HOW IT WORKS, AND WHAT IT COSTS

At your direction.

This comes through the Office of the Group CEO as support. The strategy work is complimentary within the group engagement; the marketing execution runs on a monthly retainer; the AI pilot is scoped only after the platform evaluation, so nothing is committed on faith.

Item	Basis
Diagnostics growth strategy	Complimentary within the group engagement (market value NGN 1,500,000)
Marketing execution	Monthly retainer from NGN 1,500,000; advertising budgets contracted by Medbury
AI interpretation pilot	Scoped after the platform evaluation and the governance framework

04 / NEXT STEPS

Package first, then market, then read.

1. Agree the package architecture and pricing for the first wave.

2. Launch the national digital campaign and the corporate cross-sell.
3. Evaluate the AI platforms and design the governed pilot.
