
The Lyfe Place Aesthetics

A partnership built around your practice.

Medbury Healthcare · KP Plastics · Consult for Africa

Prepared for Dr Chinwe Kpaduwa

By Debo Odulana, Consult for Africa · July 2026 · Private and confidential

01 / THE IDEA

Your practice, with a platform behind it.

Lagos has real and growing demand at the top of cosmetic and plastic surgery, and the aesthetics around it. You already do this work, and you do it well. The idea is simple: take the practice you already run and put a serious platform behind it, Medbury's site, its capital and its patient base, and a team that runs the business day to day, so you can give your time to the clinical work rather than the admin.

This is not a new venture to learn. It formalises what you already do, on a site Medbury already holds, into a partnership the three of us own together, at a scale none of us reaches alone.

02 / YOUR ROLE

Clinical anchor and named principal.

You are the clinical and surgical lead, and the face of the clinical brand. Cosmetic and plastic surgery is the anchor, with injectables, skin and dermatology alongside, all within your range. The service is built around your standards, and around your diary.

Clinical leadership is yours. When you travel, a resident clinical lead and associate surgeons carry continuity, so the service holds and your name is protected, and you lead the signature and complex cases in blocks when you are in Lagos. The partnership carries your name as clinical principal, so the practice builds lasting value that outlasts any one diary, including your own.

You focus on the surgery and the standards. Medbury holds the platform and the capital. C4A runs the business. Each of us does what we do best.

03 / THE PARTNERSHIP

Three partners, complementary roles.

Each partner brings what the others cannot. Your 34% is earned through your practice, your goodwill and your capability, the quality anchor of the whole thing, not cash you put in.

Partner	Stake	What they bring
Medbury Healthcare Group	51%	The Lyfe Place site, the capital, and the patient and corporate base.
KP Plastics (you)	34%	The practice, the capability, the credentials and the following. The quality anchor.
Consult for Africa	15%	Structures the partnership and runs the day-to-day operation.

We have talked about building something like this in Lagos before, in the Doctoora days. This is that idea, now with a real platform and real backing behind it.

04 / HOW YOU WILL WORK

Consult here, operate at a partner hospital.

The Lyfe Place in Lekki holds your consulting rooms and a procedure room, for consultations, injectables, skin, dermatology and minor procedures. Surgery under general anaesthetic is done at a partner hospital's theatre, where you operate on privileges and the hospital provides the theatre, anaesthesia, recovery, overnight beds and an ICU backstop.

That means your patients are properly cared for after surgery, inside a full hospital, without the partnership having to build and run a theatre of its own to start. It is the safest and fastest way to open. A theatre of our own can come later, once the lists are consistently full.

05 / THE SHAPE OF IT

Cash-pay, high-value, and it already has patients.

The business is surgery-led, cash-pay and high-value. Its biggest advantage is that the patients already exist: your following, the Lyfe Place patients, and Medbury's corporate base are the first channel, so the diary fills faster than a cold start ever could.

It reaches meaningful scale quickly, a business on track for well over NGN 1.6Bn in annual revenue within three years, and it is attractive by every measure. C4A brings the full numbers, the costs, the capital and the projections, to the table so every partner sees the same picture; this note keeps it high-level for you.

Your stake grows with the practice you already own, turned into lasting, transferable value, for none of your own capital at risk.

06 / WHAT WE DECIDE TOGETHER

A few decisions, made together.

None of these are settled; they are for the three of us to agree.

The decision	Where it is heading
Scope	Surgery-led, with injectables, skin and dermatology alongside.
The brand	A JV brand carrying you as named clinical principal.
Cover when you travel	A resident clinical lead and associate surgeons, with you on the signature cases.
The theatre	A partner hospital's theatre and recovery to start; a standalone of our own later.

07 / NEXT

Let's build it.

You are in Lagos this month, so the timing is right. Let us sit down with Itunu, agree the shape and settle the few questions above, and then C4A turns it into a term sheet and the shareholder agreement for all three of us to review and sign.

I have wanted to build something proper with you for a long time. This is a good one, and the pieces are finally in place. I am looking forward to it.
