

Consult For Africa

Healthcare performance, restored.

Brand essence

Positioning

Consult For Africa is a healthcare management consulting firm. We turn around struggling hospitals, install clinical governance, and stand up fractional leadership for African health systems.

Audience

Hospital owners, health-system executives, development financiers, and ministries across Nigeria, Ghana, Kenya, and the wider continent.

Tagline

Healthcare performance, restored.

Logo

Current state

Wordmark in use. PNG only. SVG master is an open item.

Usage rules

Clearspace Reserve space equal to the cap-height of the wordmark on all sides. Nothing crowds it.

Minimum size Wordmark must not render below 16 px on screen or 12 mm in print. Below that, use a future logomark only.

On dark Wordmark reverses to white. Never recolour into the gold or accent palette.

On light Wordmark sits in brand navy. Never grey, never black.

Do not Stretch, rotate, outline, drop-shadow, gradient-fill, or recolour the wordmark.

Typography & voice

Typography

Current state: system stack (San Francisco on Apple, Segoe UI on Windows). Recommendation pending: lock a neutral grotesque such as Inter or Söhne for the wordmark and a transitional serif for long-form (Source Serif Pro or Lyon) once a brand designer is engaged.

Voice principles

Senior, not salesy

Read like a strategy partner who has run a hospital, not a SaaS marketer. Gravitas earns the meeting.

Operator vocabulary

Use the words our clients use: turnaround, governance, capex, occupancy, locum, secondment.

Africa-specific proof

Lead with continent-relevant numbers and named markets. Generic global benchmarks land flat.

No em dashes

Never use em dashes in any copy, headlines, bios, or UI text. Use commas, periods, or rework the sentence.

Plain language

Write for a senior medic reading on a phone between cases. Short sentences. No jargon for its own sake.

Specific over generic

Name the hospital, the cadre, the country. Concrete proof beats adjectives every time.

Avoid AI framing

Do not lead with "AI-powered" or "AI-driven" in user-facing copy. It triggers data-privacy concerns with our audience. Describe the outcome, not the engine.

Say this, not that

Say

- + Hospital turnaround and clinical governance.
- + Fractional leadership for African health systems.
- + Operations in Nigeria, Ghana, Kenya, and beyond.

Avoid

- "Disruptive", "synergy", "revolutionary".
- "AI-powered consulting", "AI-driven insights".
- Borrowed Silicon Valley voice. We are an Africa firm.

Applications

SAMPLE HERO

Healthcare performance transformation across Africa.

Hospital turnaround, clinical governance, strategy, and operational excellence.

Approved headlines

HERO	Healthcare performance transformation across Africa.
SUB	Hospital turnaround, clinical governance, strategy, and operational excellence.
PROOF LINE	Operations in Nigeria, Ghana, Kenya, and across the continent.
CTA	Book a discovery call.

Stewardship

This guide is the working source of truth for the Consult For Africa brand. It is not exhaustive. Logomark, full typography licensing, motion principles, photography direction, and stationery templates remain open items and will be appended as they are commissioned.

Open items

- Commission SVG masters of the wordmark and any new logomark.
- Lock display and body typefaces with a licensed foundry.
- Define motion principles for hero animations and chart reveals.
- Build photography direction: lighting, composition, subject brief.
- Stationery, deck templates, email signatures, social templates.
