Lagos and Abuja, Nigeria

This one is not anonymous, and that is deliberate. Its whole value is in seeing where you agree with each other without knowing it, and where you quietly disagree. Answer as you actually think, not as you think the group thinks.

Where the growth comes from (100 points)

Write a number against each line. They must add up to exactly 100.

Converting more of the patients who already walk through our door	
More referrals from other doctors	
More cases at the hospitals Dr Bola visits	
Other surgeons working under the Osteon name	
Adding services: physiotherapy, imaging, non-surgical treatment	
Patients from abroad, or paid for by family abroad	
Total, which must be 100	

What is holding the business back (100 points)

Write a number against each line. They must add up to exactly 100.

Where the clinic is	
What patients have to pay	
Not enough doctors referring	
Dr Bola's own time and availability	
The facility itself: theatre, equipment, beds	
The team, and how the clinic is run day to day	
Not enough people knowing who he is	
Total, which must be 100
