

GROUND FLOOR

Lyfe Place International Clinic, conversion hub private medical plaza
24695 x 13025 mm / 12 rooms / 182 sqm

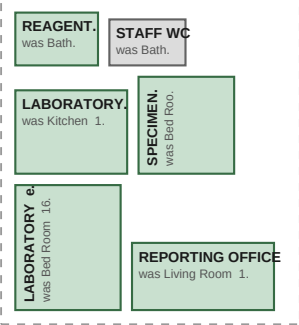

FIRST FLOOR

24396 x 12345 mm / 13 rooms / 239 sqm

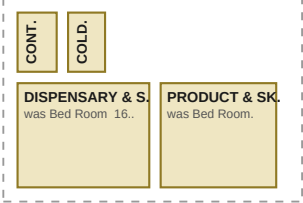

GUEST CHALET

Medbury Diagnostics laboratory
9380 x 10915 mm / 6 rooms / 61 sqm

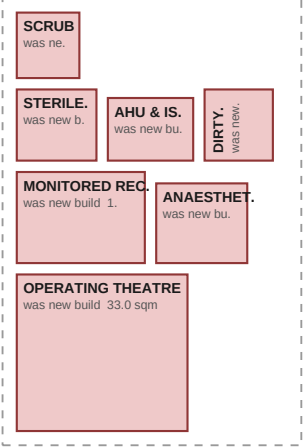

BOYS' QUARTERS

Medbury Pharmaceuticals
12515 x 4120 mm / 4 rooms / 37 sqm

DAY CASE THEATRE

ground-level unit, level trolley access
11000 x 8000 mm / 7 rooms / 81 sqm

ZONES

- Conversion hub, Alameda anchors
- Day case theatre suite, proposed
- Treatment room
- Private consulting plaza
- Medbury Diagnostics
- Medbury Pharmaceuticals
- Reception, circulation, WC
- Back of house

CAPACITY FINDINGS

- NO STRUCTURAL WALL REMOVAL. Every room is used as it stands. Subdivision adds stud partitions; light breaking is for three or four door openings only.
- Ground floor is a CONVERSION HUB, not one tenant's clinic. Alameda anchors it on 67 drive days a year; the other 209 days are sellable to other groups.
- Imaging is campus facility, not one tenant's space. X-ray, ultrasound and echo serve the Conversion Clinic, Ring 2 pre-op clearance and the theatre.
- Wet functions follow the existing plumbing. The first-floor kitchen becomes the PROCEDURE ROOM and a bath becomes sterilising. No new drainage runs.
- First floor is 5 CONSULTING ROOMS, a procedure room, the FUE suite, a 34 sqm members' lounge and a coordinator room. Not a room-maximised floor.
- A day case theatre must be at ground level for trolley evacuation, and does not fit inside the main building. It is a new unit on the grounds, and it serves Alameda,
- the aesthetic surgeons and the Ring 2 surgical specialists alike. Cases that do not need Cairo get done here and earn locally.

This is an allocation schedule, not a floor plan.

Areas are true. Positions are not: rooms are packed into equal-width columns for legibility. Overlay on the real CAD.
