

Lyfe Place Abuja

Business case.

01 / THE PROPOSITION

A private ambulatory medical campus.

A four-structure residential compound in Abuja converted into a medical park under Medbury's Medical Infrastructure Division. Senior specialists hold sessions there without taking a lease. Families buy bundled care. Aesthetic and day-case surgery anchors the identity. A laboratory, imaging and a pharmacy sit on site, so a patient is consulted, worked up, treated and dispensed to in a single visit and goes home the same day.

Campus	711 sqm gross across four structures, 519 sqm of usable rooms
Clinical capacity	5 sessional consulting rooms, a day-case theatre, a treatment room, a hair transplant suite, three imaging modalities, a laboratory and a pharmacy
Capital	NGN 647M, including two years of rent in advance
Revenue at stabilisation	NGN 584M campus revenue, base case
Return	NGN 356M a year to Medbury, payback 1.8 years from stabilisation

02 / THE BUILDING

Four structures, and what each becomes.

Structure	Gross sqm	Rooms sqm	Becomes
Main building, ground	286	182	Arrival, theatre suite, conversion clinic, imaging
Main building, first	277	239	The consulting plaza, hair transplant, treatment room
Guest chalet	96	61	Laboratory and specimen handling
Boys' quarters	52	37	Pharmacy: dispensary, retail, controlled drugs, cold chain
Campus	711	519	73% of gross is usable room

Ground floor, 182 sqm of rooms

Room	sqm	Zone	Note
Theatre	24.7	Theatre suite	Level trolley access, HEPA ventilation, isolated power
Monitored recovery, 2 bays	13.0	Theatre suite	Adjoins the theatre
Sterile store and dirty utility	7.8	Theatre suite	One-way dirty to clean
Conversion clinic, consulting 1	19.3	Conversion clinic	
Conversion clinic, consulting 2	18.2	Conversion clinic	Existing water and drainage
Digital X-ray, lead shielded	14.1	Campus	Cannot be sited elsewhere
Phlebotomy draw point	10.4	Campus	Specimens routed to the chalet
Medication collection point	6.0	Campus	Serving hatch to the waiting area
Reception, waiting, concierge	58.1	Common	Two waiting zones, scrub recess
Patient WCs	10.4	Common	

The theatre suite is ring-fenced as a sole-use zone entered off the lobby. The conversion clinic and the campus diagnostics sit outside it.

First floor, 239 sqm of rooms

Room	sqm	Zone	Note
Consulting rooms 1, 2 and 3	51.6	Sessional pool	New partitions off a central spine
Consulting room 4	19.8	Sessional pool	En-suite WC
Consulting room 5	19.8	Sessional pool	En-suite WC
Consulting room 6	22.4	Family practice	The bundled-care service
Hair transplant suite	24.3	Anchor	All-day single-patient cases
Treatment room	14.8	Anchor	Local anaesthesia, existing water and drainage
Ultrasound and echocardiography	13.7	Campus	Beside the consultants who order it
Phlebotomy draw point	5.7	Campus	So patients do not descend for bloods
Doctors' and members' lounge	34.0	Common	Part of what membership buys
Sterilising	9.4	Common	Existing water and drainage
Linen and consumables	9.9	Common	
Patient WC and terrace	13.3	Common	

Five rooms make up the sessional pool. That is what the campus can let by the session once the theatre, the conversion clinic, the family practice and the anchor have their space. At four bands a day over six days it is 5,520 half-day blocks a year.

03 / THE PRODUCT

Three revenue lines, two capture businesses.

Line	Sold to	What it is	Revenue
Panel and membership	Specialists	Access to rooms and an address without a lease. Panel for breadth, membership for the committed	Fees and sessions
Family practice	Families and corporates	Bundled annual care with quarterbacked referral into the panel. The campus's own demand engine	Packages
Day case and aesthetics	Cash-pay patients	Aesthetic medicine and surgery, dermatology, hair transplant	Theatre, treatment and suite fees
Conversion clinic	Alameda	Two ground-floor rooms and campus services	Licence
Medbury Diagnostics	All of the above	Laboratory, X-ray, ultrasound, echo	Per test
Medbury Pharmaceuticals	All of the above	Dispensing and retail	Per script

The family practice is what makes the rest work. A panel of specialists with no patients is an empty building. Bundled care generates first contact, refers into the panel, and drives the diagnostics and pharmacy volume. It is the only line the campus controls end to end.

04 / PRICING

Sessions, memberships, packages.

Sessions

Band	Length	Member	Panel or guest
Early, 07:00 to 09:00	2 hours	44,000	66,000
Morning, 09:00 to 13:00	4 hours	61,000	91,500
Afternoon, 13:00 to 17:00	4 hours	61,000	91,500
Evening, 17:00 to 21:00	4 hours	94,000	141,000
Treatment room	per session	180,000	270,000
Day-case theatre	per half-day list	750,000	1,125,000

Anaesthetist fees are billed through to the operating clinician with a coordination margin, not carried by the campus.

Membership ladder

Tier	NGN a year	Session rate	What it buys
Panel	400,000	Guest rates	Credentialing, directory listing, booking access
Associate	1,200,000	20% off guest	Pays for itself at 0.8 sessions a week
Full	2,400,000	35% off guest	Priority booking, named room preference, lounge
Fellow	4,200,000	35% off guest	A standing weekly slot, directory prominence, inclusion in campus marketing
Group	2,000,000 each	35% off guest	Three or more from one practice. Shared named room, pooled blocks, one invoice
Partnership	Revenue share	n/a	For anchor lines. The campus provides room, equipment and marketing, the clinician provides the practice

Family practice packages

Package	NGN a year	What is included
Individual	600,000	Unlimited GP access, annual screen, vaccinations, chronic disease management, quarterbacked referral
Family, up to four	1,500,000	As above for the household, with paediatric cover
Corporate, per head	400,000	Executive screen, occupational health, priority access

05 / CAPITAL

NGN 647M, and where it goes.

Capital, NGN M	Amount
Head rent, two years in advance	100.0
Agency, legal and caution deposit at 15%	15.0
Building fit-out	232.0
Theatre suite	120.0
Power, 25KVA hybrid solar	33.0
Medbury Diagnostics unit	28.0
Medbury Pharmaceuticals unit	24.0
Working capital, six months	95.0
Total capital	647.0

Building fit-out, NGN 232M

Package	NGN M
Cooling, about 28 split units and cassettes	24.0
ICT: cabling, network, CCTV, access control, emergency call, room status	15.0
Electrical: boards, solar and grid zoning, medical circuits, emergency lighting	14.0

Joinery: reception, nurse stations, room casework	14.0
Interior decoration: painting, window treatments, soft finishes	12.0
Fire: detection, alarm, escape lighting	9.0
Clinical flooring, welded and coved vinyl	9.0
Ceilings and lighting	9.0
Partitioning to form the consulting rooms	8.0
Procedure room: scrub and clinical services	7.0
Signage and wayfinding	7.0
Mechanical fresh air and extract	6.0
Plumbing: clinical hand-wash, condensate	6.0
Doors and ironmongery	5.0
Medical waste holding and route	3.0
FF&E:: consulting rooms, reception, waiting, lounge	30.0
External: car park, lighting, drainage, gate house	10.0
Water: treatment, storage, pressure, hot water	5.0
Design, project management and approvals	14.0
Contingency at 12%	25.0
Building fit-out	232.0

Theatre suite, NGN 120M

Package	NGN M
Ventilation: AHU, HEPA, ductwork, external plant	32.0
Theatre lighting, pendant, operating table	32.0
Anaesthetic machine and full monitoring	20.0
Scrub, sterile store and dirty utility fit-out	15.0
Isolated power supply panel and UPS	11.0
Recovery, two monitored stations	10.0
Theatre suite	120.0

06 / OPERATING COSTS

NGN 312M a year at stabilisation.

Cost, NGN M a year	Amount
Reimbursed on-site payroll: front office, nursing, records	45.0
Family practice: two physicians, nurse, administration	45.0
Power	28.0
Theatre running: scrub nurse, operating department practitioner, consumables	18.0
Security, cleaning, waste, insurance, internet	15.0
Maintenance and biomedical	8.0
Campus marketing and concierge	8.0
Operating costs	167.0
Mezo Health management fee, 6% of revenue plus incentive, capped at 10%	51.7
Head rent	55.0
Amortisation of fit-out and power over ten years	38.5
Total	312.2

Mezo Health manages the campus. The fee is 6% of campus revenue plus 10% of gross operating profit above a threshold, capped at 10% of revenue, so it rises only when the campus performs. On-site operating staff are engaged by Mezo and reimbursed at cost.

07 / FINANCIALS

Three cases, at stabilisation.

NGN M a year, stabilised	Low	Base	High
Members, all tiers	19	31	42
Panel specialists	30	45	55
Family practice members	100	150	200
Sessional blocks sold	1,550	2,855	4,288
Room fill	28%	52%	78%
Membership and panel fees	49.2	81.6	109.6
Sessions	133.5	241.4	361.2
Treatment room	29.8	29.8	29.8
Day-case theatre	62.1	103.5	132.5
Family practice packages	85.0	127.5	170.0
Campus revenue	359.6	583.8	803.1
Operating costs	(167.0)	(167.0)	(167.0)
Mezo management fee	(21.6)	(51.7)	(80.3)
Head rent	(55.0)	(55.0)	(55.0)
Amortisation	(38.5)	(38.5)	(38.5)
Campus contribution	77.5	271.6	462.3
Diagnostics and pharmacy, net of staff	20.4	84.4	153.9
Total to Medbury	98.0	356.0	616.2
	Low	Base	High
Capital	647	647	647
Payback from stabilisation	6.6 yrs	1.8 yrs	1.1 yrs
Break-even, share of campus revenue	78%	53%	42%

The high case runs the sessional pool at 78% fill, which is at the practical ceiling for a booked facility.

Cancellations, band preferences and no-shows mean a diary cannot be held much above three quarters full. Treat the high case as the top of what the building can physically deliver rather than as a stretch target, and note that further growth requires more rooms rather than more effort.

The conversion clinic licence is excluded from all three cases. If it proceeds it adds approximately NGN 60M a year for the two ground-floor rooms and campus services, and it is the only contracted lease line in the model.

08 / CONDITIONS

In order of when they bind.

Condition	Why
1 Head lease extended to five plus five	NGN 352M of fit-out amortised over two years does not work. Over five plus five it is comfortable. Nothing else should be committed until this lands
2 Change of use approval, and the landlord's written consent	Before the NGN 115M of rent and fees is paid
3 A quantity surveyor's take-off	The fit-out is built up by package at Nigerian clinical rates. It is the largest line in the project and needs measuring before commitment
4 Consultant demand evidenced	Membership and fill assumptions carry most of the revenue. A survey is in the field and forty responses will settle them
5 Theatre registration and NNRA licence	Facility registration to reflect surgical and sedation capability, and a radiation licence before imaging installs
6 A written transfer agreement	With a hospital holding theatre and intensive care capability, for the case that deteriorates. A licensing expectation and an insurance condition

Debo Odulana Consult for Africa / +234 913 813 8553 / hello@consultforafrica.com

Room areas are measured from the as-built drawings and are to be confirmed against the CAD. Fit-out is built up by package and requires a quantity surveyor's take-off. Session rates are derived from comparable Lagos practice. Membership uptake, room fill and family practice panel size are assumptions the consultant survey is designed to test. Not a binding offer, and not legal or tax advice. FX reference USD/NGN 1,550.
