Lagos and Abuja, Nigeria

Consult for Africa is working with Dr Bolarinwa Akinola on how his service should be built over the next two years. Rather than design it around what we think referring doctors want, we are asking you directly. The questions are about your practice and your patients, and the least useful thing you could do is be polite.

What decides where a patient is sent (100 points)

Write a number against each line. They must add up to exactly 100.

The surgeon's skill and record with difficult cases	
What it will cost my patient	
How quickly my patient will be seen and treated	
Whether the patient comes back to me, with a letter	
The facility: theatre, sterility, aftercare	
Convenience and location for the patient	
Total, which must be 100	

Referring to Dr Bola

Tick one box on each line. There are no right answers, and anything you cannot answer belongs in the N/A column rather than being guessed.

- ☐ Shorter waiting time to be seen
- ☐ Nothing, I already refer everything I can

In your own words

Optional, and usually the most useful part of the form.

The single biggest change

Where their orthopaedic patients actually end up

What they tell a patient asking about going abroad

What a genuinely good service would give them

Anything else

Please hand the completed form back in the envelope provided, or answer online at <https://www.consultforafrica.com/osteon-referrer-survey.html>. Thank you.
