

Maarova™

Assess, develop, and retain Africa's healthcare leaders.

Brand essence

Positioning

Maarova is C4A's proprietary psychometric assessment and coaching platform for healthcare leaders. Six dimensions, ICF-certified African coaches, and a measurable arc from assessment to retention.

Audience

Hospital groups, training hospitals, and health-system foundations hiring or developing frontline, middle, and executive leaders.

Tagline

Assess, develop, and retain Africa's healthcare leaders.

Logo

The image shows the wordmark 'Maarova™' in a white, bold, sans-serif typeface. The trademark symbol (TM) is positioned as a superscript to the right of the word. The logo is centered within a dark navy blue rectangular background.

Current state

Wordmark pending. The product currently ships as type-only Maarova™ alongside the C4A mark. Dedicated logomark is an open design task.

Usage rules

Clearspace Reserve space equal to the cap-height of the wordmark on all sides. Nothing crowds it.

Minimum size Wordmark must not render below 16 px on screen or 12 mm in print. Below that, use a future logomark only.

On dark Wordmark reverses to white. Never recolour into the gold or accent palette.

On light Wordmark sits in brand navy. Never grey, never black.

Do not Stretch, rotate, outline, drop-shadow, gradient-fill, or recolour the wordmark.

Typography & voice

Typography

Current state: system stack. Recommendation pending: a humanist sans (Inter, Söhne, or General Sans) for UI and report body, plus a confident display weight for hero headlines. Reserve a single serif italic for pull quotes from coaches.

Voice principles

Science, not horoscope

Maarova is psychometric. Lean on validity, reliability, and predictive language. Never describe results as personality types.

Coach-led, not algorithmic

Every output points to a human ICF-certified coach. The platform supports the relationship, it does not replace it.

Measured language for leaders

Senior consultants and CMDs are the audience. Tone is calm, respectful, and developmental.

No em dashes

Never use em dashes in any copy, headlines, bios, or UI text. Use commas, periods, or rework the sentence.

Plain language

Write for a senior medic reading on a phone between cases. Short sentences. No jargon for its own sake.

Specific over generic

Name the hospital, the cadre, the country. Concrete proof beats adjectives every time.

Avoid AI framing

Do not lead with "AI-powered" or "AI-driven" in user-facing copy. It triggers data-privacy concerns with our audience. Describe the outcome, not the engine.

Say this, not that

Say

- + Psychometric science meets African healthcare.
- + Assess. Coach. Measure. Repeat.
- + Paired with an ICF-certified coach from our African network.

Avoid

- "Personality test", "find your type".
- "AI coach", "AI-generated insights".
- Em dashes. Exclamation marks. Hustle-culture phrasing.

Applications

SAMPLE HERO

Assess, develop, and retain Africa's healthcare leaders.

Psychometric science meets African healthcare. Built by C4A. Nothing else like it.

Approved headlines

HERO	Assess, develop, and retain Africa's healthcare leaders.
SUB	Psychometric science meets African healthcare. Built by C4A. Nothing else like it.
STREAM, RECRUITING	Hire with science, not gut feel.
STREAM, DEVELOPMENT	Assess. Coach. Measure. Repeat.
STREAM, INTELLIGENCE	See your entire leadership landscape.

Stewardship

This guide is the working source of truth for the Maarova brand. It is not exhaustive. Logomark, full typography licensing, motion principles, photography direction, and stationery templates remain open items and will be appended as they are commissioned.

Open items

- Commission SVG masters of the wordmark and any new logomark.
- Lock display and body typefaces with a licensed foundry.
- Define motion principles for hero animations and chart reveals.
- Build photography direction: lighting, composition, subject brief.
- Stationery, deck templates, email signatures, social templates.
